

ABSTRACT OF THE DISCLOSURE

08/243,279

5 A pharmaceutical composition is disclosed in the  
form of a nonirritating emulsion which includes at  
least one cyclosporin in admixture with a higher fatty  
acid glyceride and polysorbate 80. More particularly,  
the cyclosporin may be cyclosporin A and the higher  
fatty acid glyceride may be castor oil. Composition  
has been found to be of a high comfort level and low  
10 irritation potential suitable for delivery of medica-  
tions to sensitive areas such as ocular tissues. In  
addition, the composition has stability for up to nine  
months without crystallization of cyclosporin.
